Berenson traces the origins of the pandemic to the Wuhan Institute of Virology, a Chinese government-run laboratory that was studying coronaviruses in bats. He shows how the Chinese government covered up the outbreak of the virus, allowing it to spread unchecked throughout the world.

As the virus spread, governments around the world panicked and imposed draconian lockdowns. These lockdowns caused widespread economic

devastation, social isolation, and mental health problems. They also led to a sharp increase in government surveillance and control.

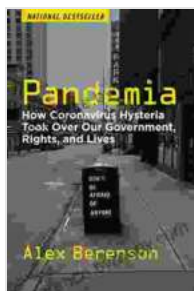

Berenson argues that the lockdowns were not necessary and that they did more harm than good. He cites the example of Sweden, which did not impose a lockdown and has had a much lower death rate from COVID-19 than countries that did impose lockdowns.

Berenson also exposes the role of the media in fueling the coronavirus hysteria. He shows how the media exaggerated the threat of the virus and created a climate of fear and panic. This fear and panic led to the public supporting the government's draconian measures.

How Coronavirus Hysteria Took Over Our Government, Rights, and Lives is a must-read for anyone who wants to understand the true impact of the coronavirus pandemic. Berenson's meticulously researched and hard-hitting exposé will change the way you think about the virus, the government, and your own rights and freedoms.
