There's the story of the inventor who failed hundreds of times before finally creating a successful product. There's the story of the entrepreneur who

lost everything in the Great Depression but went on to build a multi-million dollar business. And there's the story of the artist who overcame poverty and homelessness to become one of the most celebrated artists of her generation.

These stories are inspiring, but they're also important. They remind us that anything is possible if we never give up. They show us that even the most unlikely people can achieve great things if they have the tenacity to keep going and the dumb luck to be in the right place at the right time.

Here are just a few of the stories you'll find in *How Tenacity and Pure Dumb Luck Changed the World*:

- The story of Thomas Edison, who failed thousands of times before inventing the light bulb.
- The story of Henry Ford, who lost everything in the Great Depression but went on to build a multi-million dollar business.
- The story of Vincent van Gogh, who overcame poverty and homelessness to become one of the most celebrated artists of his generation.
- The story of Marie Curie, who became the first woman to win a Nobel Prize and the only person to win Nobel Prizes in two different scientific fields.
- The story of Nelson Mandela, who spent 27 years in prison for fighting against apartheid but went on to become the first black president of South Africa.

These are just a few of the many stories of tenacity and dumb luck that have changed the world. They are stories that inspire us, remind us that anything is possible, and show us that even the most unlikely people can achieve great things.
