## The Shadow of Guns

The illegal wildlife trade casts a long shadow over tiger conservation.

Poachers, driven by greed, ruthlessly hunt these animals for their valuable fur and bones, leaving behind a trail of carnage and devastation. The book

exposes the intricate networks of poachers, smugglers, and corrupt officials who fuel this illicit trade, threatening the very survival of tigers.

### **The Lure of Gold**

In the mineral-rich forests of central India, the quest for gold has become a deadly threat to tigers. Mining operations not only destroy their habitat but also pollute water sources, harming both wildlife and local communities. The book uncovers the complex interplay between mining, corruption, and environmental degradation, revealing the devastating consequences for tigers and the ecosystem they depend on.

### **The Wages of Greed**

Human-wildlife conflict is another major obstacle to tiger conservation. As human populations encroach on tiger habitats, conflicts arise over resources, leading to retaliatory killings and injuries. The book explores the

causes and consequences of human-tiger conflict, highlighting the need for innovative solutions that balance the needs of both humans and wildlife.

The uneasy coexistence: a tiger ventures near human settlements, a testament to the challenges of human-tiger conflict.
