Types of Acrylics

- **Heavy Body:** Thick, opaque, and suitable for impasto techniques.
- **Soft Body:** Liquid, easy to flow, and ideal for glazing and washes.
- **Fluid:** Thin, highly pigmented, and used for airbrushing and fine details.

Choosing the Right Supplies

Brushes

Select brushes with synthetic or natural bristles that are compatible with acrylics. Consider the size, shape, and stiffness for different painting techniques.

Canvas

Choose canvases with a suitable texture and priming to ensure paint adhesion. Stretched or unstretched canvases are available in various sizes.

Palette

Use a wet palette to keep paints moist and prevent them from drying out. Acrylic palettes come in a variety of materials, including plastic or wood.

Basic Techniques

Color Mixing

Experiment with mixing acrylics to create a wide range of hues and tones. Remember that acrylics dry slightly darker than how they appear wet.

Glazing

Apply thin, transparent layers of acrylics over one another to create depth and luminosity in your paintings.

Impasto

Use thick layers of acrylics to build up texture and create a sense of volume in your work.

Washes

Dilute acrylics with water to create washes, which can be used for backgrounds, glazing, or adding subtle color effects.

Advanced Techniques

Blending and Transitions

Use blending techniques to create smooth transitions between colors and create a sense of depth. Wet-on-wet, dry-over-dry, or using a medium can all be effective.

Composition and Perspective

Study composition principles and experiment with different perspectives to create visually appealing paintings that draw the viewer's attention.
